Organizational Updates

Since January 1st through the end of March of this year, PITFM has received 44 case requests. Of these requests, 6 met the criteria and were therefore accepted and assigned a Private Investigator. 2 are currently under review and awaiting more information. 1 was located by PITFM without hiring a PI. 3 were located by family or police. The remainder were screened out due to eligibility requirements, however in several of these cases, PITFM offered referrals and other forms of assistance to these cases.
